CAMBRIDGE SCIENCE PARK STATION AND INTERCHANGE

Appendix 14 – Chapter Headings for Ecological Management Plan

FEBRUARY 2013
Content

1 INTRODUCTION
   Background to the Site Ecological Plan
   Responsibility of the developer to the Environment and Designated Sites

2 THE SITE
   Conservation status of features at and adjacent to the development
   Site description and current operation

3 THE PLAN
   Scope
   Aims and objectives
   General description of habitats and other measures planned
   Delivery of the Management Plan

4 REPTILE (COMMON LIZARD) MITIGATION STRATEGY

   Legislation and licensing
      Legislation in respect to Reptiles
      Potential licence requirements at the Development

   Status of Common Lizard
      Status in the UK
      Status in Cambridgeshire
      Status at Development site

   Baseline Assessment of the Development Site

   Mitigation Proposals
      Fencing
      Translocations

   Habitat Creation – Breeding Areas
      Area and specification
      Location
      Methods
      Timing
      Aftercare
      Management

   Habitat A
      Area and specification
Hibernacula/Refugia
Area and specification
Location
Methods
Timing
Aftercare
Management

Existing Habitat Management
Area and specification
Location
Methods
Timing
Aftercare
Management

Monitoring Methods and Schedule
Reptile surveys
Habitat A condition monitoring
Data analysis and review
Habitat suitability for foraging reptiles

5 SITE HABITAT CREATION PLAN

Site Preparation
Aim
Area and Specification
Location
Timing
Methods

Habitat B
Aim
Area and Specification
Location
Methods
Timing
Habitat C
Aim
Area and Specification
Location
Methods
Timing

6 SITE AFTERCARE PLAN

Generic Aftercare Measures
Habitat A
Timing and Methods
Monitoring and Reporting
Data analysis and review

Habitat B
Timing and Methods
Monitoring and Reporting
Data analysis and review

Habitat C
Timing and Methods
Monitoring and Reporting
Data analysis and review
