Existing vegetation retained and managed to maintain and enhance habitat value.

Shrub planting
Amenity grass
Species rich meadow grassland
Legend

Native hedgerow
Asphalt footway
High quality concrete setts/blocks
High quality natural stone
Invertebrate/reptile habitats

Proposed shrub/herbaceous planting within raised planter
Proposed native specimen trees

Existing vegetation retained at site perimeter to provide screening.

New native hedgerow and tree planting along road to provide habitat connectivity.

Creation of wetland habitat around existing temporary wetland.

Vegetation management and provision of nesting boxes e.g. for kingfisher within drainage channel area.

New habitat areas, including for invertebrates.
