The exit from the proposed new development poses a high risk of serious road traffic accident. There is a sharp blind bend at the bottom of the hill, approaching from Rampton. This is often taken at speeds of up to 60 - 70 mph. The likelihood of tailbacks down this road due to the extra traffic joining from the proposed new development mean that a serious accident is highly likely to occur.

I also consider the placing of a large roundabout at the junction of Rampton and Oakington roads and the proximity of the edge of the roundabout to the front of the 2 houses facing on to it (who will be forced to give up a large part of their gardens) is completely unacceptable in a village made up of B roads.
