I am writing to complain about the over development of this green field site.

This development will increase traffic on poor quality roads that are already subsiding under the weight and causing damage to the utilities underneath.

The extra housing will add to the demand for the already full primary school and nursery. Any new developments should include provision for more school places. While extra housing is required in the area the corresponding infrastructure and facilities should be provided at the same time as with the Northstow site. Development should not be allowed in incremental pockets to the detriment of the the village facilities.
