Redevelopment of the Grain store on Lodge Road, Thriplow – S/3591/17/FL
New car repair workshop on Brook Road, Thriplow – S/3567/17/FL
New grain store, Fowlmere Road – S/3566/17/

I feel that these proposed developments for a New grain store, Fowlmere Road – S/3566/17/ are inappropriate for the following reasons;

The proposed transportation will be operating 24 hours 7 days a week, leading to psychological stress or physiological effects on the local population due to noise levels and pollution.

The levels of pollution will increase having an adverse effect on the local wildlife and rural setting. This will adversely affect the local neighbourhood and Foxton village.

As stated: Table 1 Observed Effect Levels due to Noise (NPPG)
Noise can be heard and causes small changes in behaviour and/or attitude, e.g. turning up volume of television; speaking more loudly; where there is no alternative ventilation, having to close windows for some of the time because of the noise.
Potential for some reported sleep disturbance. Affects the acoustic character of the area such that there is a perceived change in the quality of life. Observed Adverse Effect Mitigate and reduce to a minimum
Significant Observed Adverse Effect Level Noticeable and disruptive
The noise causes a material change in behaviour and/or attitude, e.g. avoiding certain activities during periods of intrusion; where there is no alternative ventilation, having to keep windows closed most of the time because of the noise. Potential for sleep disturbance resulting in difficulty in getting to sleep, premature awakening and difficulty in getting back to sleep. Quality of life diminished due to change in acoustic character of the area. Significant Observed Adverse Effect Avoid Noticeable and very disruptive
Extensive and regular changes in behaviour and/or an inability to mitigate effect of noise leading to psychological stress or physiological effects, e.g. regular sleep deprivation/awakening; loss of appetite, significant, medically definable harm, e.g. auditory and non-auditory Unacceptable Adverse Effect
