I wish to object to the planning application on the grounds of Impact on the landscape, Highway safety and increase in traffic pollution:

1. The building will be in a flat open area of farmland. To erect an 18m high structure will be an unnecessary blot on the landscape.
2. The proposed location will create an increase in large heavy grain lorries passing through Foxton:
   a. The High Road in Foxton is a narrow road, with cars often parked outside the shop/Post Office. Large lorries passing through will be dangerous, increasing the risk of road accidents.
   b. There is a narrow bend in Foxton at the former vicarage. It is already a blind corner, and increasing the number of large lorries will add to the danger of accidents.
   c. Foxton Primary School is off the High Street. Lorries passing through Foxton add to the danger of an accident involving a school child.
   d. Lorries will increase pollution in the village, particularly if they are manoeuvring past parked cars and pedestrians.
3. This proposal is to relocate an existing store in Thriplow. Why can it not be located nearer to the main roads to use existing transportation links rather than running through small local villages?
