I wish to object to the proposed Farm and Grain Store development on Fowlmere Road between Foxton and Fowlmere. This development will bring increased flow of slow moving heavy agricultural equipment and this will impact on the existing traffic that uses this important link road. In addition, heavy grain lorries will have to negotiate the narrow lanes and windy roads in the surrounding towns and villages causing damage to roads and congestion, particularly at the proposed entry to the farm. Grain stores are tall buildings and will have a negative impact on the appearance of this open farm land, and will be visible from a considerable distance. The high noise levels generally associated with such buildings will have a detrimental impact on those living within hearing distance.
