Dear Sir/Madam,

Re the above proposal to move Waterbeach Station to a new location within the proposed new town.

Whilst realising the need for Waterbeach Station to increase in size in relation to the increase in number of service users, I do object to the idea of the station being relocated to the proposed new site. Originally, access to the proposed new location was to be from the A10 and there would be little increase in the amount of traffic accessing the site through Waterbeach village. I note, however, that this proposal has been dropped and access will now be through the village and mostly through residential areas. This will mean a significant increase in traffic using our already congested streets. Furthermore, there is the potential for the junction of Bannold Road/High Street/Denny End Road to become more dangerous than it presently is. Cody Road is presently difficult to navigate at present due to the construction traffic/parked cars and this problem is unlikely to disappear. Furthermore, valuable green belt land will be removed and fresh air will be replaced with fumes from air polluting traffic. There will be an increase in traffic on roads unfit for purpose and an increase in the level of noise and light pollution. All of this is detrimental to those living near the proposed development. The present station is easily accessed by residents and commuters whilst the proposed station would be more difficult to reach and involve access via residential areas.
