Comments

Application to South Cambridgeshire District Council for Full Planning Consent for Relocated railway station comprising platforms, pedestrian bridges, access road, pedestrian and cycle routes, car and cycle parking, with other associated facilities and infrastructure at Waterbeach ref. S/0791/18/FL.

The Association notes the provision of a long canopy on the eastern platform, this being the platform where it is especially important that passengers spread out to minimise boarding times. We ask that full provision of this canopy be made a condition in any consent. We also ask, bearing in mind the anticipated permanent retention of the agricultural land to the immediate east of the station, that suitable all-seasons hard or soft screening be provided to the east of the eastern platform matching its length to mitigate the proposed station’s exposed position and that such provision is also made a condition of any consent.
